

Genetec Macro - Delete Unassociated Credentials [ITG]

Macro used to delete unassociated credentials automatically

Notes[*\(Revisions\)*](#)

When ran, this macro will delete any credentials in the system which are not currently associated with a Cardholder, to help keep the system clean. It is recommended to run this macro on a schedule. You could run it hourly, daily, weekly, or monthly depending on your goals. There is no additional configuration necessary for this macro.
